

Employee Reliability Inventory Screening System ERI® Win

We are pleased to announce the recent release and immediate availability of new software for administering and scoring the Employee Reliability Inventory Screening System (ERI®) - ERI®Win v.1.00

Features of the new ERI®Win software include the following:

- Compatible with the Windows® 95, Windows® 98, and Windows® NT operating systems.
- Major enhancements in ease of use and program operability
- Enhanced interface for *computer administration to applicants*, including more detailed instructions and multiple “user friendly” enhancements
- Expanded real-time guidelines for helping to interpret an applicant’s results
- Structured questions for follow-up interviews and reference checks, based on the applicant’s actual ERI® results
- Can be used on your Company’s network/intranet so that the results from distributed locations can be stored and accessed centrally
- Additional scorings obtainable by phone within minutes
- Demonstration mode is available for staff training
- Complete program is downloadable from the Internet for program evaluation
- Password protection for maintaining the security of confidential information

The ERI® screening system, was developed and validated over a period of 3.5 years. It has been in continuous commercial use since 1986. In that time, more than 1.7 million copies of the system have been used by over 8,000 companies, to identify reliable and productive job applicants throughout the Western Hemisphere and in the United Kingdom.
